## EDUCATION

---

**Ryerson University, TRSM** | [Toronto, ON](#)

***Bachelor of Commerce, Business Technology Management*** [September 2018 - June 2021](#)

A four year long program dedicated to business management and information and communication technologies (ICT). Hands-on experience on how to analyze business needs, design technology-based processes, manage projects, consulting, customer and supplier management, and marketing.

Relevant courses: Computer-Enabled Problem Solving, Business Intelligence, Systems Analysis and Design, Big Data.

- TRSM Dean's list for the academic year of 2020/2021.
- Acquired a Minor in Economics.

**University of Toronto, SCS** | [Toronto, ON](#)

***Coding Certificate*** [December 2022 - June 2023](#)

A 24-Week bootcamp in collaboration with edX. This full stack flex course teaches fundamental skills needed to become a full stack web developer. Includes numerous collaborative projects that mimic

real world problems, applying Agile Development and Computer Science. Extended studies further teach: Python, Java, AWS and C#.

## PROJECTS

---

### Happily Ever Prints

June 2023

Github Repo: <https://github.com/weddingprintproj3/HappilyEverPrints>

Developed a scalable, user-focused MERN app with a team. Fully functional site dedicated to fulfilling wedding-related print needs. The goal was to empower users by providing them with intuitive tools to design their own wedding cards. The site is deployed in Heroku utilizing MongoDB & Stripe payment.

### Heart Disease Classification using Neural Networks

January 2021 - April 2021

■ ITM703 - Heart Disease Classification Using Deep Neural Networks.pdf

Created an AI algorithm to successfully predict if a patient is diagnosed with heart disease or not based on attributes such as blood pressure, cholesterol, age and more. Worked with three other members through Google Colab for easy access and collaboration.

- Used Excel, Python (libraries such as numpy, pandas)

### Apex Tools Sales & Rentals

September 2020 - April 2021

■ ITM90AB ATSR Project Solution.pdf

This capstone project represents a comprehensive analysis of real-life business challenges and focuses on designing a new enterprise solution for ATSR. The team consisted of six members tasked to redesign an IS solution where rental service is quick and effective in meeting timely rental needs of major construction companies. Learned valuable experience in project managing and business process design.

## WORK EXPERIENCE

---

### PazCam Studios | [@pazcamdigitalstudio](#)

Assistant part-time photographer [ Freelance ]

June 2018 - Current

- Supported in filming weddings, business meetings and other event organizations.
- Captured highlights and edited photos through Adobe/Sony video software.
- Operated camera equipment, full frame and cropped sensors (APS-C and Micro Four Thirds).
- Developed partnerships with small companies and business facilitators.

### Bulk Barn | [Mississauga, ON](#)

Sales Associate

May 2015 - August 2016

- Worked as a cashier clerk, handling transactions and promoting special deals in the store.
- Organized product displays and managed inventory.
- Developed conflict resolution skills through assisting customers in their needs.
- Took part in training newly hired employees by assigning tests modules, mandatory for work safety protocols.
